Re Item V.

- 1 The following documents is referred to in this communication:

D1: US-A-3 185 423

- 2 Document **D1**, which is considered to represent the most relevant state of the art, discloses a support assembly (10) for an item of furniture with radially extending stabilizing arms (144, 154, 164, 174).

From this, the subject-matter of independent claim 1 differs in the construction of the displaceable support (30) member described therein.

- 2.1 The subject-matter of claim 1 is therefore **novel** (Article 33(2) PCT)

The problem to be solved by the present invention may be regarded as:
How to provide a self-stabilizing arrangement for an item of furniture ?

- 2.2 The solution to this problem proposed in claim 1 of the present application is considered as involving an **inventive step** (Article 33(3) PCT) because none of the available prior art documents would lead the skilled person to arrive at the differentiating features of the displaceable support member (30).

The features of independant claim 17 also satisfy the requirements of Article 33 PCT, as do all of the allowable dependant claims.
